

Living environmental changes for inhabitants of the shoreline due to climate change (LEADER, EAFRD, CLLD)

### **Outline**

The "Pays de Coutances" works in partnership with other local authorities on a significant project called: "Our shoreline for tomorrow" (*Notre littoral pour demain*). This project aims to anticipate the consequences of the climate changes on our shoreline, and to question choices of its sustainable management from now to 20, 50 and 100 years.

CLLD Pays de Coutances, which is a public authority in the field of cooperation and development, would like to link a cooperation project to this one, starting from April/May 2017 and ending by August 2018.

**The cooperation project's goal is to create a European partnership on similar geographical areas with spatial planning issues affected by shoreline changes. More specifically, we are looking for public local authorities from sedimentary macrotidal coastal territories (sandy beaches and dunes) which have shellfarms (at best) and beachfront activities that are threatened with climate changes and could be relocated in the future.**

**We would like it to be an exchange of good practices to handle with relocation and compensation matters for relocated firms and inhabitants.**

### **Call**

- Title and reference number: LEADER project (CLLD)
- Funding programme: EAFRD
- EC service: DG Agri
- Link to the call document:
- Closing date:

### **Duration**

18 months (May 2017 - August 2018)

### **Partners involved**

"Pays de Coutances", Normandy, France

### **Partners type and roles of interest**

Pays de Coutances is looking for **public local authorities** from sedimentary macrotidal coastal territories (sandy beaches and dunes) which have shellfarms (at best) and beachfront activities that are threatened with climate changes and could be relocated in the future.

Pays de Coutances is particularly interested in local authorities located in the **Baltic, North Sea and Atlantic sea basins**.

### **Financial aspects**

- EC contribution:
- EC co-funding rate:

- Foreseen project budget:

**Deadline**

Monday, 1 May, 2017
