

WELCOME

Skanderborg Utility - Key tasks

Water Supply

- 1 mio. m³/year
- 270 km. pipes
- 5 water works
- 7.000 households

Waste Water

- 6,4 mio. m³/year
- 1.145 km. pipes
- 6 facilities
- 20.000 households

Climate Adaptation

- 12 climate projects in total
- 2 prize winners
- Part of Coast to Coast
Climate Challenge

Låsby Søpark

A climate adaptation project combined with significant citizen involvement to meet rainwater management and recreational needs.

Permavej

In the town of Galten we have designed a permeable road, Permavejen, that permits rainwater to pass through the asphalt and transports it to the nearby park.

Vandtrappen

With changed curb heights and minor changes in the existing surfaces, we now control the water

AQUAGLOBE

TOGETHER FOR WATER

“

AquaGlobe – Water Solution Center – connects the most innovative and ambitious players in the water industry to provide solutions delivering access to clean water and sanitation for all.

Together we develop, test and demonstrate new, innovative and sustainable water technology directly in the operational supply net of Skanderborg Utility while measuring its performance in real time.

AquaGlobe is...

- Real-life test facilities
- Water Visits for customers
- Edge in system solutions
- Virtual Solution Show Room
- A hook to the innovation ecosystem
- Better branding and recruitment
- Visibility and Global Goals

THE UTILITY

- Asset Management
- ISO Certification
- Organizational Culture

THE LOCAL AREA

- Climate Change Adaptation
- Local Environment
- Circular Network

THE WORLD

- Demonstration and Export
- Test and Prototyping
- Entrance to Danish water technology
