

C2C Coast to Coast Climate Challenge

Climate Adaptation in Partnerships

Holistic and sustainable solutions with added value

Project manager C2C CC
Dorthe Selmer
Central Denmark Region

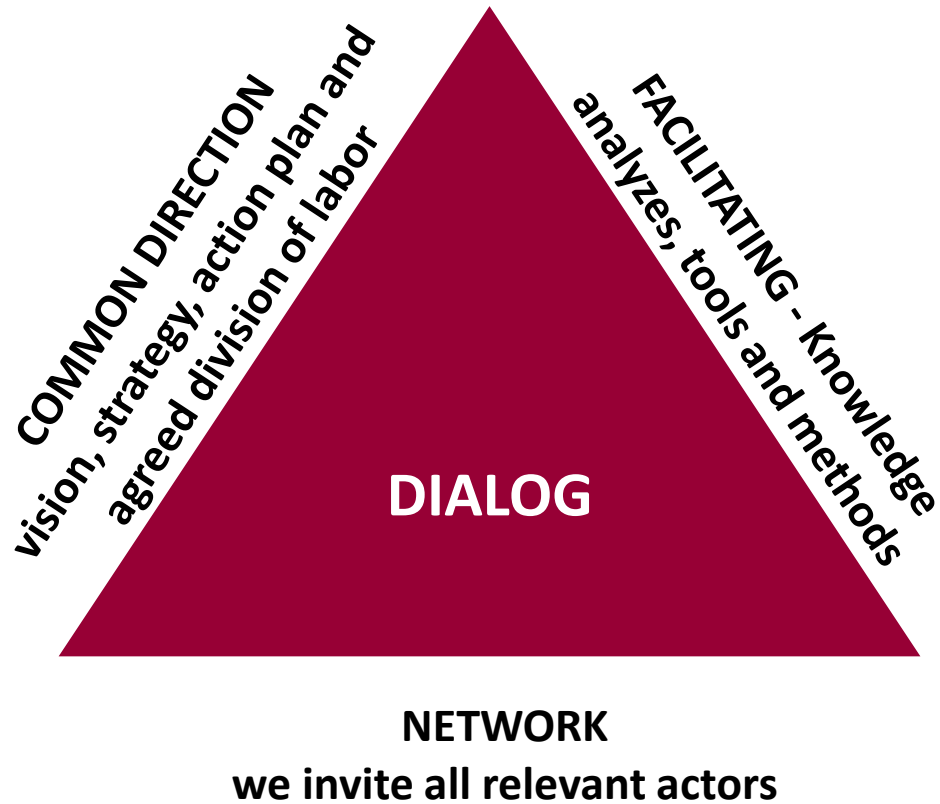

A fantastic example of solving water challenges and at the same time creating a wide range of added value

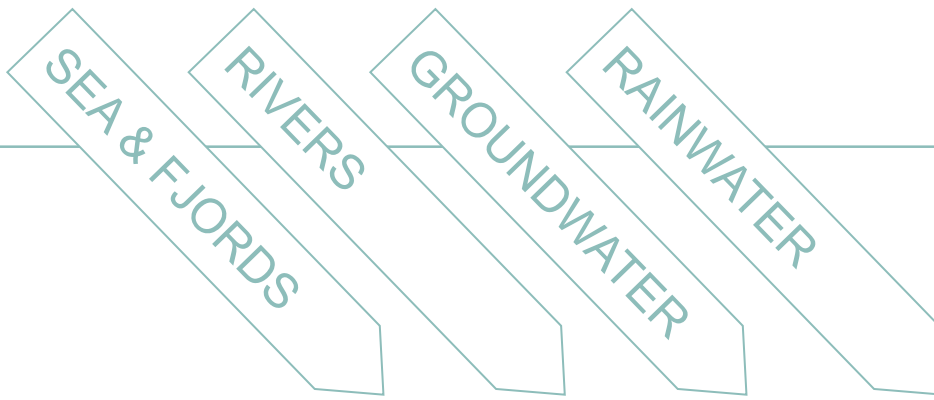

The Way We do it

Quardrouble helix

- authorities
- universities
- companies
- civil society

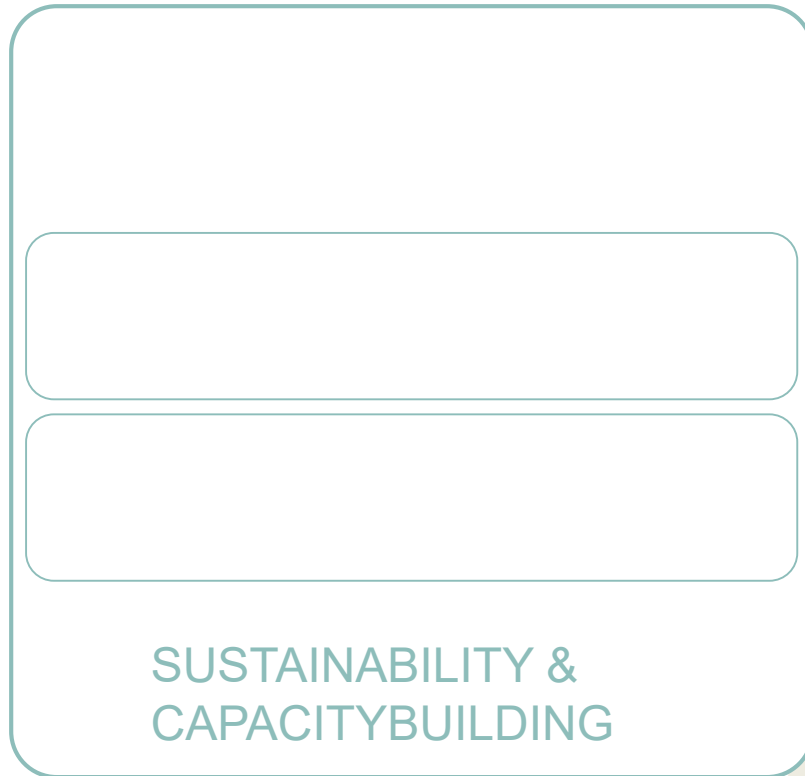

GOVERNANCE

TOOLS

INNOVATION

It's about

- Knowing best practise
- Cultivate the network among actors
- Capacitybuilding
- Experiment with co-creation methods
- Gather experiences
- etc.

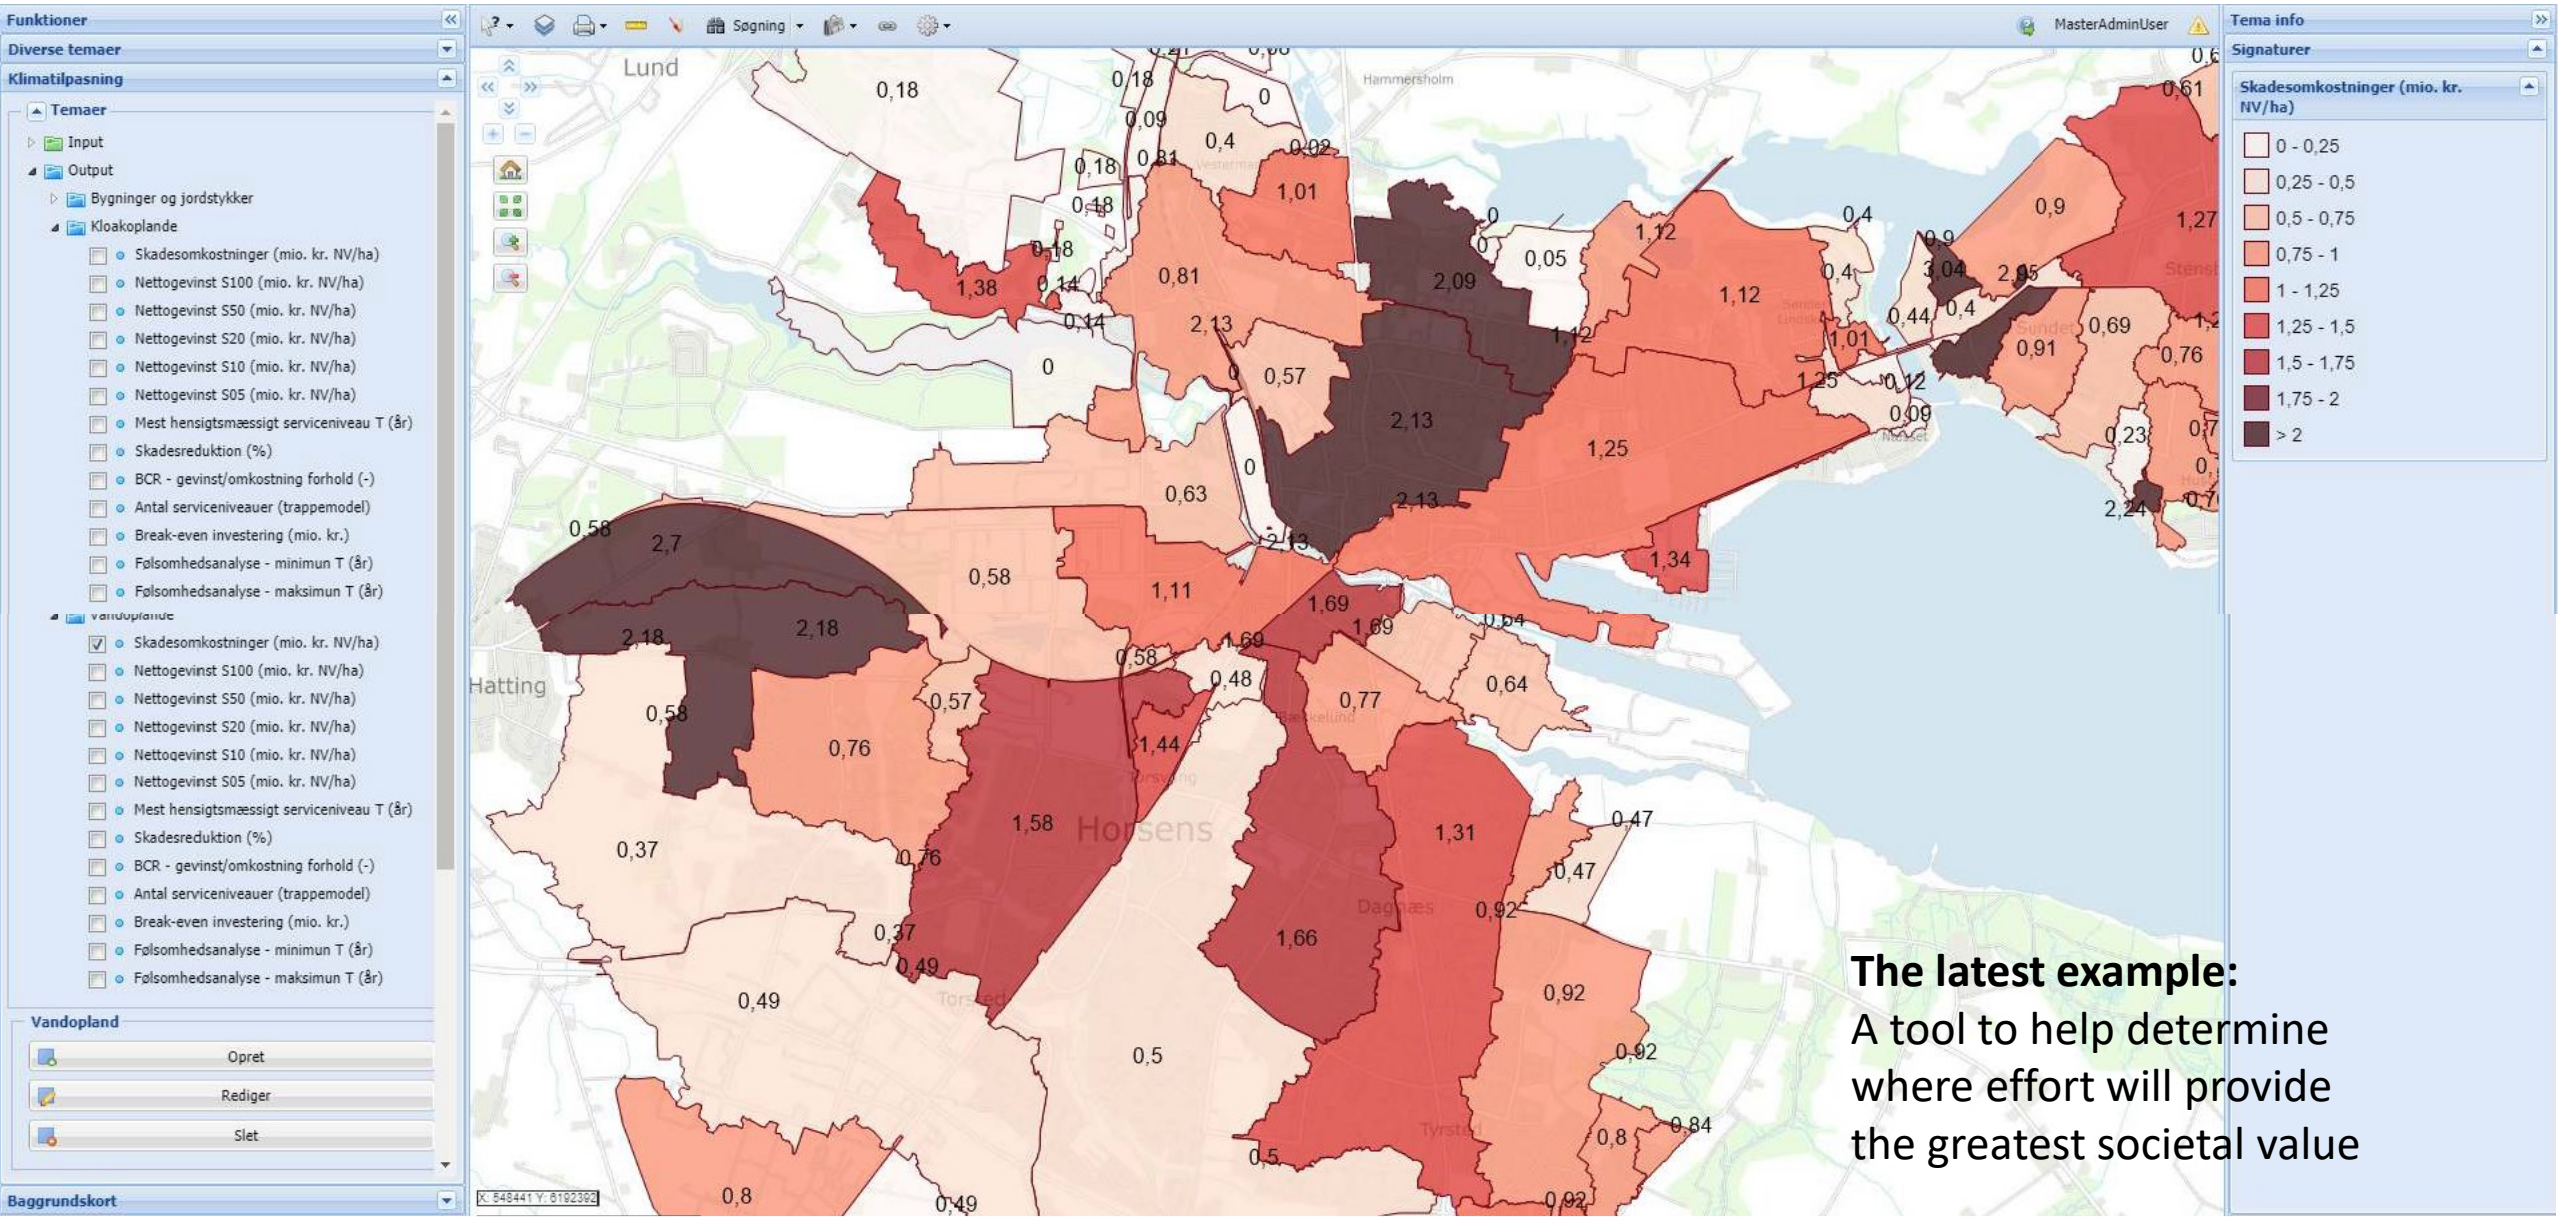

Formulation of a common strategy

- Complementary projects
- What is the needs
- More tools?
- More knowledge / more ekperiments?
- Financing all the ideas

and

- Find out. What about the network!

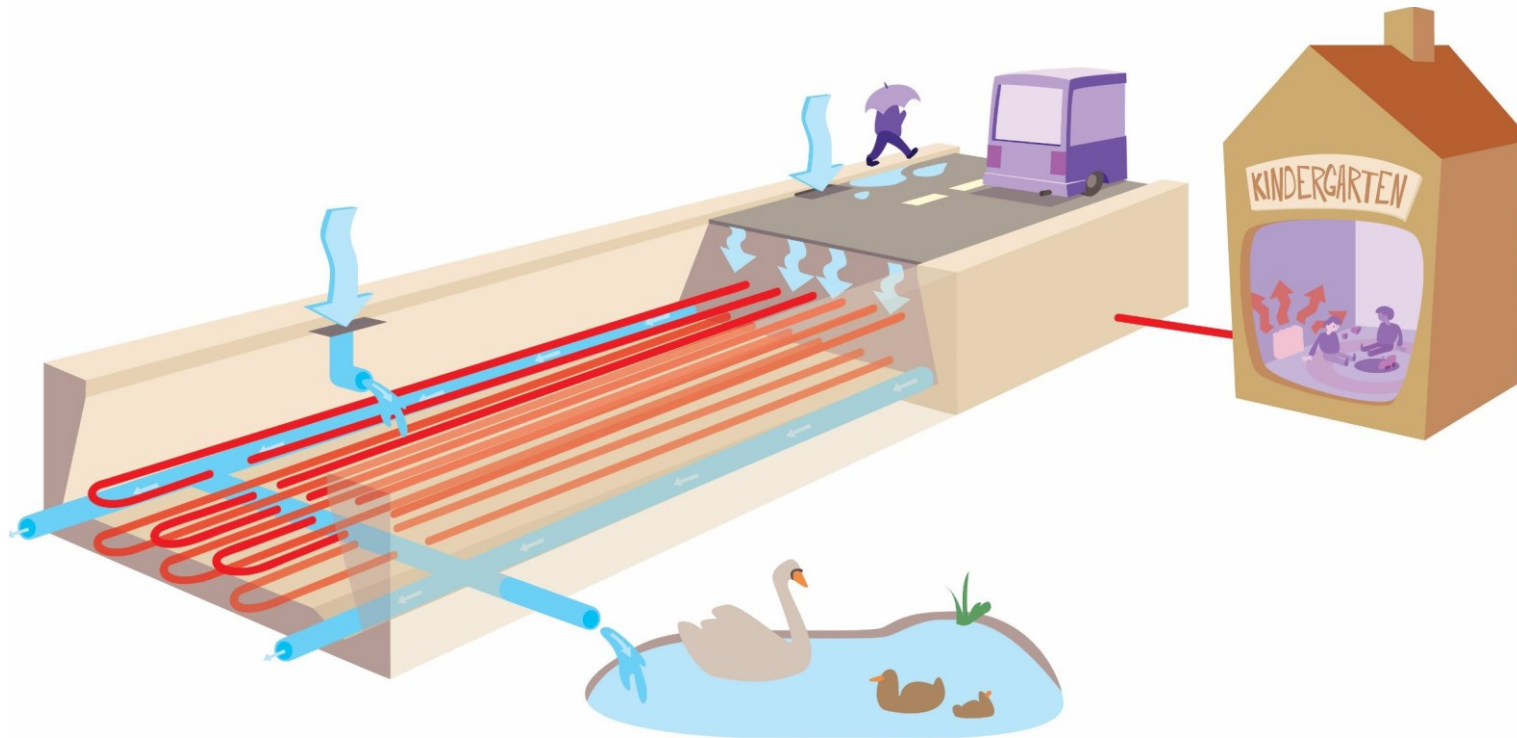

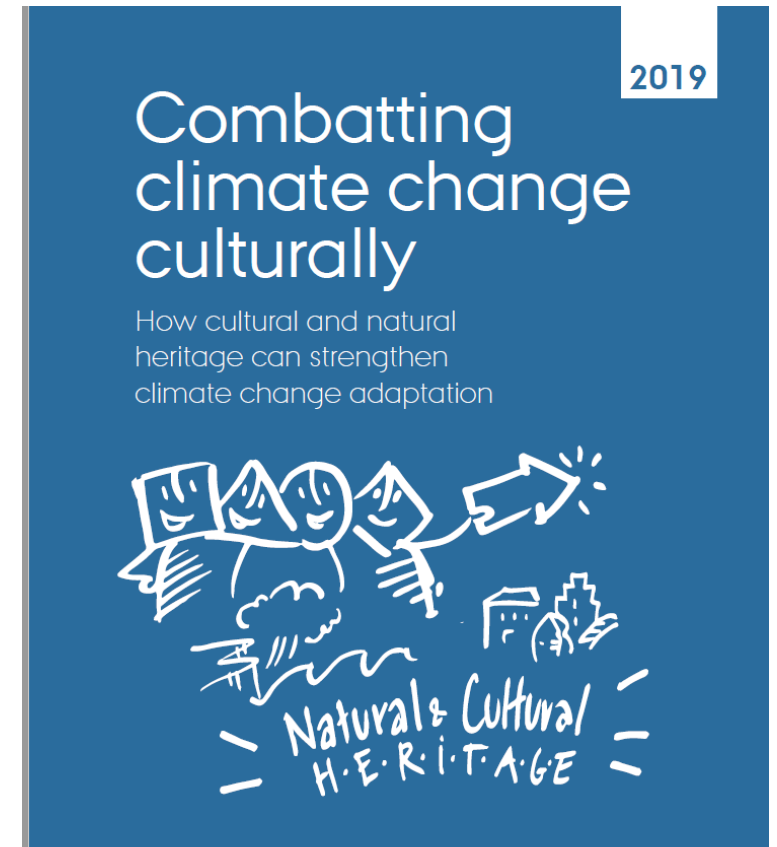

The latest example:
 A tool to help determine where effort will provide the greatest societal value

The Climate Game

- See opportunities
- Create added value
- Sustainable and holistic solutions

- The project ends 31 12 2022
- After phase 2 was created complementary projects for 175 mill EUR
- We are now building a portfolio of obvious subsequent projects for After LIFE

The partnership shows the way to secure a climate resilient region
